Where Better Nursery Stock Is Grown

#### FOREWORD

For the past several years we have had the privilege of furnishing nursery stock through County Agents, Demonstration and Agricultural Teachers to thousands of farmers and home-owners. This method of distribution is becoming more and more popular, because the Agent and Teacher are in position to follow up the sale of plants and trees with practical advice to the buyer as to the scientific methods of planting and cultivating.

We wish to express our appreciation for your patronage the past seasons. Many new customers have been added to our list, and we have put forth our best efforts toward your satisfaction. Many of you have sent duplicate and repeat orders, and we feel that our sincere efforts to give you something for your money have produced results that have been of mutual benefit.

We urge you to take advantage of these new LOW PRICES, an unprecedented offer in an effort to market a lot of FINE QUALITY SURPLUS STOCK. Orders booked for shipment on any date specified.

Varieties: Several new varieties are included in this issue of our list. We try to keep abreast of the times in varieties, but do not include new ones until it has been determined that there is merit to them. The descriptions given are accurate, and our variety list is so complete that perfectly satisfactory material may be found in it to completely furnish any home grounds or orchard.

Warranty: We exercise the greatest care to keep our varieties true to name and hold ourselves in readiness at all times to replace, on proper proof, all stock that may prove otherwise, or refund the amount paid, but it is mutually agreed that we shall not be liable for any amount greater than the original price.

Terms: Prices shown in the list are f. o. b. our nursery, but we make no charge for boxing or packing. Freight, Express or P. Post is to be paid by customer. Cash with order, unless you wish shipment sert C. O. D., and even then a part of the purchase price should be sent with order.

Special Discount: If your order amounts to \$50.00 or more, we allow a straight discount of 5 percent from list. This special concession makes it desirable to send "Club Orders"; two or three, or several persons sending their orders together to be included in one shipment. More and more of the agents and teachers are taking advantage of this Club rate, much to the advantage of their patrons. This not only gives them the low rate on quantity lots, and discounts on orders amounting to \$50, or more, but also gives them advantage of low freight or transportation charges.

We will be glad to serve you often during the season.

#### CUMBERLAND VALLEY NURSERIES, Inc. McMinnville, Tennessee

J. R. Bragg, Pres.

We can furnish most of the varieties in fruit trees and berry plants that are grown in this section. We grow some varieties that are not shown in this list and we solicit your orders for your full needs. If not able to furnish exactly, we will send one nearest like it unless you specify that we shall not substitute. This has reference to small assorted orders—on commercial orders WE DO NO SUB-STITUTE.

#### Varieties:

Early or Summer Apples:

Yellow Transparent. Earliest variety of apple. Fruits pale yellow, slightly acid, and markets in good condition. Trees bear young.

Maiden Blush. A late summer apple. Possibly the best commercial variety for cooking in its season.

Early Harvest. One of the earliest summer apples. Trees very vigorous and productive. Fruit tender with yellow skin. Good for eating and cooking.

Red June. An early summer apple, producing medium sized red fruit of distinctive flavor. No home orchard is complete without it.

Hackworth. A southern variety of distinctive merit. Should have a place in all family orchards in Dixie.

All Red Duchess. A late summer variety which thrives anywhere, developed from sport limb of regular Duchess. A heavy bearer of well flavored fruit. An all purpose apple.

Early McIntoch. Follows Transparent in ripening; Flesh white, tender, juicy, and fine flavor. Has same prominent qualities as the Winter McIntosh.

Milton. A very handsome new Apple of the Mc-Intosh type. Fruit a beautiful pinkinsh red, with tender, crisp, white flesh of excellent flavor. Trees hardy and vigorous.

Red Astrachan. Medium size, yellow with dark red patches; flesh decidedly acid and juicy; excellent for cooking, and very satisfactory for home planting. Trees hardy and vigorous.

King Tompkins. An extra large Apple, very red with tint of yellow; flesh yellow, crisp, juicy, subacid; good quality.

Late Fall Apples:

Grimes Golden. A favorite yellow apple. Fruit medium, uniform, yellow. Flesh, tender and crisp, slightly acid. Stores well.

Kinnard's Choice. Originated in Tennessee. One of the best all purpose red apples. Similar in color to winesap, but ripens earlier. Appreciated wherever known.

Northern Spy. A hardy healthy apple that is very productive and stores well. Brings top market price.

Northwestern Greening. A fall apple in the South, but ripening later in northern localities where it is hardy and very productive. Fruit pale, waxy yellow, sometimes faintly blushed.

Tolman Sweet. The leading sweet apple. Trees hardy, long-lived and bear early. Fruit pale yellow, sometimes blushed. Flesh firm, white and sweet.

Wealthy. Another fall apple in the South, which is hardy in the North. Fruit of good appearance, shaded to dark red. Flesh tender sub-acid. Especially adapted to sandy soils.

Yellow Delicious. An all-purpose apple with almost every good quality. Trees vigorous and productive. Fruit uniform in size, coloring to a good yellow color. Flavor very distinctive and pleasing

Dark Red Delicious. The same description as for the Red Delicious applies to this very popular new variety; and in addition to having all the desirable qualities of the original Delicious, it also has the advantage of an exquisite deep red color covering the entire fruit. One of the best additions to the list of apple varieties since the original Delicious.

Anoka. Called the "Old Folks Apple" because it comes into bearing at an early age, often having some fruit the second year after planting. It is very resistant to cold temperatures, bears heavily. Fruit is of good size, colored red with yellow streaks, ripens in mid-summer, and is fine for cooking. The tree does not grow so large as some other varieties, and is therefore good for planting in the yard, if other space is not available.

York Imperial. A late fall or early winter variety planted largely in the Virginias and adjoining states. Fruits keep and ship exceptionally well. Winter Apples:

Baldwin. Probably the most extensively grown of any winter apple in the Eastern states. Fruit uniform in shape, yellow blushed and mottled with red. Flesh crisp, tender and juicy.

Cortland. Very similar to McIntosh, but if possible an improvement. Fruit bright deep red in color. Flesh snow white, firm, crisp and tender.

All Red Jonathan. Everybody places this variety among the best in both appearance and quality. Medium sized fruits with brilliant red skins. Flesh nearly white, crisp and tender with a distinctly pleasant aroma.

Mammoth Black Twig. A seedling of Winesap, growing more vigorously. Bears large fruits of good quality.

Rome Beauty. An excellent market variety. Fruit uniform and very attractive. Planted largely in commercial orchards, but fits well into the home orchard.

Red Rome Beauty. Quite an improvement over the Rome Beauty as far as color is concerned. Quality practically the same.

Winesap. Thrives everywhere planted. Fruit excellent. Keeps well and is good commercially.

Winter Banana. Trees very hardy, vigorous and fruitful. Fruit clear, pale yellow, with a delicate blush. Flavor rich, mixture of sweet and sour.

Yates. Very popular in the South, especially in Georgia. A heavy bearer and good keeper. Fruit will often stay on trees until near Christmas if not picked.

Fameuse. (Snow.) Very popular early Winter Apple. Snow-white flesh from which it takes its name. Deep crimson in color and very pleasant to eat out of hand. Fills the gap between early fall and late winter apples. Trees very hardy and productive.

Gano. (Back Ben.) A handsome large apple of perfect shape, smooth, glossy, deep red skin; flesh white, slightly tinged with yellow; firm rather coarse, crisp mild sub-acid flavor. Excellent keeper, standing long shipments; usually packed in barrels.

All Red McIntosh. In addition to having all the desirable qualities of the original McIntosh, it has the advantage of deep red color covering the entire fruit. Flesh white, tender, juicy, sub-acid; Tree hardy, vigorous, and healthy; starts to bear young and heavily. It is a favorite for market and eating.

Turley. (Turley Winesap.) The Turley is gradually winning its way solely on its merits. The tree is vigorous and bears fruit early. Fruit is very red and inclined to be large. Season just ahead of Stayman's Winesap.

Wagoner. A large apple of beautiful bright red; fine texture, high flavor, and excellent quality. Tree bears early and is a reliable cropper.

Black Stayman. Larger than the common Winesap, with rich, dark red fruit. Keeps well and can be used in every way. One of the best commercial varieties as well as an all purpose apple for home use.

Crab Apples:

Transcendent. An early ripening variety ripening in August. Color yellow overspread with bright red. Flesh very crisp and tender.

Whitney. Ripens in late August. Has all the good qualities that an early Crab Apple can have. Very tender and juicy. Not excessively acid when ripe.

#### PEAR-Whips.

3 to	3 feet	\$ .20	$$1.75 \\ 2.25$	20.00
	PEAR—2 yr. B	ranched	l.	
	4 feet		3.00 3.50	27.50 32.50
	6 feet		4.00	37.50

#### Varieties:

Bartlett. Grown profitably in every pear growing section in America. Trees vigorous and bear young. Fruits large and long with clear yellow color when mature. Flesh fine grained and juicy.

Pineapple Pear. Resembles the Keiffer, with crisp, juicy, coarse flesh. Fine for cooking and canning. So far, it his proved to be blight-proof. Ripens July and August.

Garber. An earlier pear than Kieffer. Hardy north and south. A very vigorous grower producing fruits suitable for culinary purposes.

Kieffer. Grown largely for culinary purposes. Grows to large size. Fruit long and heavy. Flesh coarse and not so sweet. Largely planted for canning.

Seckel. Very vigorous and productive. Fruits reddish-brown of medium size. One of the best all purpose pears.

#### PLUM.

128 0	H	Each	Per 10	Per 100
2 to	3 feet	.20	1.75	15.00
3 to	4 feet	.25	2.25	20.00
4 to	5 feet	.30	2.75	25.00

#### Varieties:

Abundance. Best known Japanese variety. Adapted to a wide variety of soils. Excellent in home orchard. Fruit dark mottled red. Very sweet and juicy.

Burbank. Trees not so vigorous as Abundance, but fruits keep better and ship in good condition when picked a few days before entirely ripe. Fruits dark yellow, mottled red. Flesh yellow, firm and tender.

Red June. Trees large and productive and remarkably free from disease. Color red with small russet dots. Flesh yellow, meaty and sweet, except near the seed. Excellent variety.

Shropshire. Best known Damson. Very vigorous, hardy and productive, often overladen with fruit. Color blue-black. Flesh golden yellow. Good variety if you are planting one tree or one thousand trees.

Wickson. One of the largest plums. Fruit red over yellow, flesh of amber yellow which is juicy, slightly coarse, firm and sweet. A very showy variety.

#### CHERRY.

			Each	Per 10	Per 100
2 to	3	feet	\$ .30	\$2.75	\$ 25.00
3 to	4	feet	.35	3.25	30.00
4 to	5	feet	.40	3.75	35.00

#### Varieties:

Black Tartarian (Sweet). A widely planted sweet cherry. Adapts itself to many different soils and climates. Fruits ripen early. Purplish red flesh that is sweet and juicy.

Dyehouse (Sour). Ripens a week earlier than Early Richmond. Fruits slightly smaller, color dark red. Flesh yellowish white with tart juice.

Early Richmond (Sour). The leading early sour cherry. Trees vigorous everywhere planted. Fruits dark red. Flesh pale yellow, tender and melting.

May Duke (Sour). This is one of the oldest and most widely planted varieties. Fruit early, color light to red. Flesh dark red with pleasing flavor.

Montmorency (Sour). The most popular sour cherry grown in America. It is surpassed by no other sour cherry in vigor and health. Fruit light to dark red. Flesh pale yellow tinged with red; very juicy.

Gov. Wood (Sweet). A wonderful sweet cherry for home use. Trees bear early. Fruit large, yel-lowish-white tinted with crimson. Flesh tender, sweet and juicy.

#### APRICOT.

		Each	Per 10	Per 100

#### Varieties:

Champion. Tree vigorous and very productive. Fruit large. Flesh pale yellow, very firm and juicy. A good standard variety.

Orange.An early ripening variety, more adapted to the North. Color golden yellow. Flesh pale yellow becoming dark red when cooked. Quality good.

#### GRAPES.

Each Per 10 Per 100 2 year ......\$ .15 \$1.25 \$ 10.00

#### Varieties:

Concord. The most widely known grape in America. Very fruitful every year. Clusters uniform. Fruit black, firm and juicy.

Delaware. Next to Concord in popularity. Bears abundant crops of spicy red fruit. Very rot-resistant.

Moore's Early. Almost identical with Concord in frusting habits and quality, except earlier to ripen.

Niagara. This is the leading green grape. Vines vigorous and productive. Not as hardy as Concord, but withstands sub-zero temperature. Bunch and berries slightly larger than Concord. Very tender and juicy.

Worden. A week or ten days earlier than Concord. Fruit of very high quality, large purplish black. Flesh green, very sweet and mild.

#### SCUPPERNONG.

	Ea	ch	Per 10	Per 100
Price	\$	.35	<b>\$3.25</b>	\$ 30.00

#### Variety:

Scuppernong (Muscadine). This is a well known favorite in the South. They are usually trained on overhead trellises and need very little care after once started. The fruit is of a brownish color, very meaty, and has a pleasant sweetish taste.

#### PEACH.

4 to 5 feet	.20	1.75	<b>15.00</b>	125.00

#### Varieties:

Augbert. A freestone peach similar to Elberta, but later and in many respects superior. Tree vigorous and productive; very valuable. Ripens during August. At the head of the list for commercial planting and for home orchards for canning purposes.

Belle of Georgia. Fast growing, vigorous tree bearing large, creamy-white fruits, with crimson cheek. Flesh white, tinted red at pit. Semi-cling. Mid-season July.

Carman. A very conspicuous, white peach, doing equally as well north or south. Fruit medium-sized popular shipping variety. Earlier than Belle of Georgia. Early July variety.

Champion. The standad white freestone. Trees very productive. Fruit very attractive, as well as good flavor. Late July.

Early Rose. An early ripening variety, often called second early. White semi-freestone peach. Good blush and excellent flavor for an early peach. Ripens mid-June.

South Haven. A fine hardy peach of the Elberta type, though it ripens about two weeks ahead of Elberta. It is a freestone peach with yellow meat and highly colored skin. It ripens over a period of near two weeks which makes it very fine for local marketing.

Hale Haven. Ripens about midway between Golden Juilbee and Elberta. Has the large size and round shape of the J. H. Hale, is a perfect freestone, and has a tough skin that makes it one of the best shipping varieties. Yellow fleshed and highly colored skin—these combined with its excellent shipping quality and large size, make it one of the very best for commercial planting. The tree is an excellent grower.

Early Crawford. Large, yellow variety of rich flavor. Tender flesh and very juicy. Ripens along with Belle of Georgia.

Early Elberta. Ripens about ten days before Elberta. More roundish and slightly sweeter.

Elberta. The standard yellow peach. Grows in every peach growing state. Gives good crops of well-formed fruit.

Golden Jubilee. An early, yellow freestone peach, ripening from three to four weeks before Elberta. Very highly praised wherever gown, both as a market and home variety.

Hiley. A variety similar to Belle of Georgia, but ripens at least two weeks earlier. White with red cheek. White, juicy flesh. Good shipper.

Early Hiley. Large, freestone peach; flesh white, with general appearance and qualities of regular Hiley Belle, except ripens about ten days earlier. Was developed from sport limb of regular Hiley in southern Georgia. Prolific bearer and good shipper. Favorite and profitable for early market.

J. H. Hale. A large, deep red peach with yellow Has practically no fuzz, and the strong flavor characteristic of Elberta is absent. Ripens in mid-July.

Gage Elberta. This comparatively recent introduction came from an Illinois orchard from a bud sport of Elberta, and in its years of trial has proven highly disease resistant. Tree has many characteristics of the Elbetra, but is more spreading in habit of growth. Blooms come later than those of Elberta, and fruit ripens about 5 days after Elberta.

Late Elberta. Almost identical with Elberta, except ripens about ten days later. A good follow-up for Elberta.

Shippers Late Red. A splendid peach to follow Elberta, which it follows about one week. The fruit is large, colored red, with yellow flesh and freestone. Fruit is firm and ships well. A desirable variety.

Mayflower. Ripens earlier than any other peach. Trees hardy, and productive. Fruit medium, entirely covered with red. Ripens before June 1 in this section.

Red Bird. One of the best early peaches. Bright red color, with good flavor. Good commercial variety. Ripens in early June.

Rochester. One of the hardiest varieties. Largely grown in the Eastern states, but has proven a good variety almost everywhere planted. Fruit long pointed. Flesh yellow, stained red near seed.

Heath Cling. One of the old favorites. A late, white clingstone peach that keeps well when removed from tree. Excellent for cooking whole as stone gives no bad flavor. Ripens in September.

Krummel. A valuable peach where a late variety is wanted. Color light yellow, blushed with carmine. Flesh yellow, fine texture, juicy and somewhat acid.

#### BLACK RASPBERRY.

Each Per 10 Per 100 Per 1000 \$ .04 \$ .30 \$2.50 \$ 17.50

Variety:

Cumberland. Very hardy and productive. A tall upright grower. Fruit large, glossy black. Flesh firm, juicy and sweet. Seeds small.

#### RED RASPBERRY.

Each Per 10 Per 100 Per 1000 \$ .05 \$ .40 \$3.00 \$ 20.00

#### Varieties:

Chief. The most dependable early red raspberry. Considered by some superior to Latham. Fruit almost equal in size and quality to Latham.

Latham. One of the largest and most prolific reds. Very large, juicy fruit of excellent quality.

St. Regis. Ever-bearing variety. Gives crops of fruit throughout the summer. Fruit medium size, highly flavored.

Van Fleet. A thrifty grower of merit. Fruit large red and very showy.

#### BLACKBERRY.

Each Per 10 Per 100 Per 1000 \$ .05 \$ .40 \$2.25 \$ 17.50

#### Varieties:

Early Harvest. One of the earliest varieties, very prolific. Good market variety.

Eldorado. Very vigorous and hardy. Berries very large and ripen together. Very sweet.

#### DEWBERRY.

Each Per 10 Per 100 Per 1000 **\$ .50 \$ .40 \$2.25 \$ 17.50** 

Varieties:

Austin. A most productive market variety, bearing enormous crops of large berries at least a week before other varieties.

Lucretia. A very hardy variety, producing berries of extra size and quality. Very sweet and luscious.

#### GOOSEBERRY.

Each Per 10 Per 100 **\$** .15 \$1.25 \$ 11.00

Downing. Very vigorous and productive. Fruit light green with distinctive veins. Juicy with fine flavor.

Houghton. Abundant bearer. Vigorous grower. Fruits dark red, sweet and juicy.

#### CURRANTS.

Each Per 10 Per 100 \$ .15 \$1.25 \$ 11.00

Varieties:

London Market. Plants tall, upright and vigorous. Berries dark red.

Prince Albert. Vigorous, upright grower. very late. Sour and very highly flavored.

Wilder. A very popular commercial variety. Fruit grows in clusters. Red colored and exceptionally showy, as well as being of the highest quality.

#### STRAWBERRIES.

 Per 100 Per 500 Per 1000

 Single Crop
 \$1.00 \$2.50 \$ 4.00

 Everbearing
 1.50 4.00 7.50

 Varieties. Single Crop.

Aroma. A mid-season variety that is very resistant to frost damage. Berries large, red clear through.

Blakemore. A good early berry that is fast replacing some of the early varieties. Fruit averages larger than other varieties, and ships well.

Gandy. Last to ripen, and a fine berry. Klondike. The standard shipping variety. bearer of firm red berries that ship in good condi-

Everbearing varieties: Progressive, Mastodon and Gem.

#### BOYSENBERRY.

Each Per 10 Per 100 **\$ .30** \$2.00 \$ 15.00

Variety:

Boysenberry is the sensational new berry, being a cross between Loganberry, Raspberry, and Blackberry. Berries get to be 1½ to 2 inches long, 1 inch thick; Sweet, few seeds, and hardy. Fruit firm enough to stand handling and shipping to market. Vines hardy and can be grown anywhere. Whether you are growing barries for market, or just a few in your garden, it will pay you to get started right now. 25 plants will be plenty for home use. 600 plants will set an acre, set 8 ft. by 8 ft. 8 ft.

#### NEW YOUNGBERRY.

Each Per 10 Per 100 \$ .15 \$1.00 \$ 7.50

Variety:

H

P

New Youngberry. This new berry is much different from any berry that is grown in most parts of the country, being a cross between Loganbeiry and Dewberry. Fruit is wine color, size 1 to 1½ inches. Flavor is pleasant, sweet, with the tartness of the blackberry. Excellent for table use, canning, jellies, pies and for wine. The plant is a rank grower, and adapted a wide range of soils.

#### FIGS.
